

dahl-beck electric

Maritime Field Services

dahl-beck electric is a third generation family owned and operated electric motor repair facility that prides itself on our business ethics, technical knowledge and customer satisfaction. We have been in continuous operation by the Beck family since 1933 and this experience is what separates us from other motor repair facilities. Our 70+ years of practicing this craft has undeniably qualified us as experts.

Your equipment never seems to break down during normal business hours but more likely in the middle of the night, weekends or holidays. We understand how vital this equipment is to your operation and have dedicated ourselves to getting your facility back online ASAP. The *dahl-beck electric* service staff is available 24 hours a day, 7 days a week, 365 days a year. Help is just a phone call away. **510-237-2325 day or night.**

Our fully-equipped, EASA (Electrical Apparatus Service Association) certified motor repair facility is housed in 54,000 square feet of building space on over 3 acres of land. This space enables us to take a systematic approach to shop set-up, equipment placement and job staging in an effort to more efficiently move jobs through the repair processes.

dahl-beck electric not only repairs motors, generators and pumps, but we're also a full service marine electrical contractor. In fact, this is how we made a name for ourselves years ago on the wooden piers of the San Francisco waterfront.

Before local politics drove the Navy's Pacific Fleet from the San Francisco Bay waters in the late 1980's we played an integral roll in the fleet's electrical maintenance. Some of the maritime industries most formidable years were during wartime (World War II, Korean, Vietnam) when the San Francisco Bay and various ports were teaming with activity. Things have settled down a lot since those days, but we continue to service the many container and tanker vessels that call on the ports of Oakland, San Francisco, Richmond and the other smaller ports up and down the bay. We also continue to play an active roll in the ongoing maintenance and upgrades of the local Ready Reserve Force (RRF). This is the fleet of Maritime Administration (MARAD) cargo ships used to provide prompt sealift support in the event they are needed for the rapid deployment of military forces. The RRF must be ready to depart on short notice (typically 4 to 5 days) to backup the actions of the battle group. Today we continue to have an experienced group of marine electricians ready to come aboard to troubleshoot and repair your crane controls, tension winches, motor control centers and lighting systems. These are only a few of the systems we specialize in. So whether your tugboat or tanker needs routine maintenance or emergency repairs, we're always here to help.

Did you know that *dahl-beck electric* is affiliated with Beck Electric Supply? Beck Electric Supply has been the primary marine electric supplier on the United State's West Coast for over 30 years. They have many unique product lines catering to the specific needs of the maritime industry, such as: GE Industrial Systems, GE Drive Systems, GE Lighting, Hubbell Wiring Devices, Thomas & Betts, Cutler-Hammer, Phoenix Lighting, Carol Cable, Russellstoll, ESL & Mipco, to name a few.

Beck Electric Supply has these specialty products on the shelf and ready for immediate shipment to your container vessel, tanker, cruise ship, fishing trawler or pleasure craft. Beck Electric Supply has three locations to serve you, Richmond, CA (510) 215-9499, Wilmington, CA (310) 834-1151 and Seattle, WA (206) 763-2011. They have the experience and resources available to find anything you are looking for, so give them a try. Please feel free to look them up on the world-wide web or order online at www.beckelectric.com.
